

August 26 - December 13 | WED, 6:00-8:30 PM

Early Childhood Education

**Safe, Healthy & Nutritional Programs for
Early Childhood Education**

An in-depth study of the planning for and evaluation of safe, healthy, nutritional early childhood environments.

The course reviews the relevant policies, regulations and quality guidelines that support healthy, safe environments for the young child, birth through age eight. Requirements include a minimum of four hours of observation and six hours of participatory advocacy work.

Topics include:

- Planning, creating and evaluating play in learning environments and curriculum
- Family needs, related community resources issues, trends, and advocacy needs
